At school sponsored events both students and the general public may be subject to scanning by a metal detector. Scanning shall be random except in situations where the administrator has reasonable suspicion based on observation of behavior or a report provided by a reliable source. Any student attempting to evade a metal detector will be deemed to be in violation of this policy and will be subject to disciplinary action.

Personal search of a student shall be conducted by a person of the same sex as the person being searched and shall be witnessed by at least one other school employee, when practicable shall also be of the same sex as the person being searched. A search conducted under this policy shall be reasonably related to the objective of the search and shall not be excessively intrusive in light of the age and sex of the student and the nature of the alleged infraction.

who attempt to evade a search will be subject to discipline, which may include out-of-school suspension.

Student's clothing will not be removed unless it is cold weather outerwear, shoes, hand, and head coverings (excluding religious head coverings) prior to or during the conduct of any school search. An exception is made when a legal warrant has been obtained through appropriate legal process. If a search will involve removal of any student's clothing, other than cold weather outerwear, shoes, hand, and head coverings, then the student should be detained and the following action taken:

Building administrators shall inform all pupils through written explanation in the student instructions, handbook, or disciplinary code that the student has no reasonable expectation of privacy rights towards school officials in school lockers, desks, or other school property. Pupils shall not have any reasonable expectation of privacy toward school administrators or teachers in the contents of a school locker, desk, or other school property.

School personnel have access to school lockers, desks, and other school property in order to properly supervise the welfare of pupils. Authorization is given for school lockers, desks, and other areas of school facilities to be opened and examined by appropriate school officials at any time. No reason shall be necessary for such search.

The Superintendent may designate school personnel to transport any dangerous weapons, controlled dangerous substances, alcoholic beverages, or missing or stolen property that might be in a student's possession from a school site to a centralized location within the school district or to local law enforcement offices for lawful disposal. While in transport, the designated school personnel shall carry their school identification and a letter from the Superintendent confirming their authority to transport the items for disposal. All items transported for disposal shall be transported in a locked container.

In accordance with provisions of Title 70, Section 24-100.4 of the Oklahoma Statutes, the professional educator "shall have the same right as a parent or guardian to control and discipline such child according to district policies during the time the child is in attendance or in transit to or from the school or any other school function authorized by the school district or classroom presided over by the teacher." Building administrators shall advise professional staff of provisions of this policy and insure that professional staff members are familiar with legal steps to be observed in the conduct of a personal search of a student.
